

ALEJANDRO AZNAR

Data Scientist | Data Analyst (Biostatistics & Pharma)

Madrid, Spain · alaznar01@gmail.com

LinkedIn: [linkedin.com/in/alejandroaznar-/](https://www.linkedin.com/in/alejandroaznar-/) · GitHub Page (portfolio): alaznar.github.io/

Biotechnologist specialized in Data Science & Biostatistics with experience in pharma clinical & safety data. Hands-on with R, Python, SQL, JavaScript, Power BI, Excel (Power Query/Macros, DAX) and IBM Cognos to build analyses, dashboards and automated workflows. Proven record designing data validation frameworks, managing clinical/safety databases, and supporting GVP/GCP audits. Eager to bring analytical rigor and domain expertise to a Data Science team.

CORE SKILLS

- Programming & Data: R, Python, SQL; data wrangling, statistics, experimental design
- BI & Reporting: Power BI, IBM Cognos; KPI design, DAX, data modeling; Excel advanced
- Processes & Quality: Data validation frameworks, documentation, audit readiness (GVP/GCP)
- Automation: Excel macros, JavaScript scripts for SaaS automation; reproducible pipelines

WORK EXPERIENCE

Safety & Clinical Data Systems Specialist – Laboratorios Farmacéuticos Rovi | 2023-Present

- Analyze clinical and safety datasets using R and Excel to generate statistical summaries and operational insights for medical/safety stakeholders.
- Administer and validate safety & clinical databases, ensuring accuracy, traceability and audit readiness under GVP/GCP.
- Build BI reporting with IBM Cognos and Power BI; create dashboards and communicate to stakeholders.
- Lead projects to improve system efficiency and end-to-end data validation, documenting checks and workflows.
- Deploy automated processes with JavaScript for cloud SaaS tools to reduce manual tasks and turnaround time.
- Participate in audits and inspections (GVP/GCP), contributing evidence and CAPAs.

Senior Pharmacovigilance Specialist – Meisys | 2023

Pharmacovigilance Officer – Meisys | 2021-2022

- Managed ICSRs and literature monitoring; maintained PV documentation (PSUR, PSMF); supported signal detection and audit activities.

EDUCATION

MSc, Bioinformatics and Biostatistics – Universitat Oberta de Catalunya | 2022-2025

MSc, Biomolecules and Cell Dynamics – Universidad Autónoma de Madrid | 2020-2021

BSc, Biotechnology – Universidad de Zaragoza | 2016-2020

CERTIFICATES & EVENTS

Biostatistics and NMA in Clinical Research (Meisys, 2023) · XIII National Pharmacovigilance Congress (Oviedo, 2024) · Erasmus Program (UCD, 2019) · IX Institute for Biocomputation and Physics of Complex Systems Congress (2020)

PROJECTS

- Garmin Data: Data Analysis and Modeling of Garmin Sportswear data.
- Breast Cancer Survival Analysis: Analyze survival data from over 600 breast cancer patients (GBSG2 dataset) to identify prognostic factors and quantify their effect on survival time.
- Diabetes Multiclass Prediction: Classification of patients into 3 different groups: Diabetic, Prediabetic or Non-diabetic
- FAERS Adverse Events SQL Project: Built an SQLite database from FDA FAERS data to analyze drug safety, with a focus on Ozempic (semaglutide) adverse events.
